Subject: EPA Assessment at Federal Mogul
Attachments: Federal Mogul - Trip Report Final - Redacted.pdf

Mr. Pudliner,

Attached is the trip report summarizing EPA's assessment at the Former Federal Mogul site. You should have also received the POLREP 1 for the site which I sent out earlier today. Our assessment identified some lead contamination in soil along the edge of the property. You indicated during previous conversations that the City of Weatherly was willing to conduct additional assessment related to lead contaminated soil and coordinate with PADEP's Act 2 program. I am copying Thomas Hartnett, PADEP on this email. Please let me know that you received this email and keep me apprised regarding the progress of assessment and cleanup activities at the site. Also, please don't hesitate to call me with any questions you may have regarding the reports.

Repectfully,

Dom Ventura
On Scene Coordinator
